

Shibil Shamsudheen

AI Automation Builder · Agent Developer

Chemical engineer turned AI agent builder — I build autonomous systems that run while I sleep, from 24/7 trading agents to n8n automation pipelines.

PROFESSIONAL SUMMARY

AI Engineer with proven expertise in designing and deploying intelligent autonomous agents that solve real business problems. I've built production-grade AI systems including a 24/7 autonomous trading agent leveraging LLMs (Groq LLaMA, Claude API) and a multi-node workflow automation pipeline that integrates advanced AI frameworks for intelligent decision-making. My experience spans agent architecture, LLM integration, API orchestration, and full-stack deployment on production infrastructure. I'm seeking to apply this hands-on AI systems expertise to drive automation and business impact within a forward-thinking organization.

PROJECTS

Stock Trading Agent v2

2025 – Present

Live Dashboard · GitHub

- Autonomous NSE intraday paper trading agent in Python — scans top 20 Nifty 50 stocks every 15 min using yfinance and pandas-ta; processes ~96 trade signals/day across 20 symbols
- 3-layer signal system (ORB, VWAP, Momentum) validated by Groq LLaMA 3.1 — every trade signal confirmed by AI before execution
- Deployed on Hostinger Ubuntu VPS managed by Supervisor — 6+ months continuous uptime, zero manual restarts; all signals and daily P&L; pushed live to Telegram
- Built a custom Node.js MCP server with 7 tools for natural-language agent control via Claude Desktop
- Hermes Agent (OpenRouter / LLaMA 3.3-70B) configured as Telegram-based remote control interface

AI Job Hunter Agent

May 2026

GitHub

- 7-node n8n workflow deployed on Hostinger VPS — scrapes UAE job boards daily and delivers curated AI-filtered digests via Gmail; zero manual intervention since deployment
- Pipeline monitors 5+ platforms simultaneously, filters by role relevance using LLM classification, and delivers a ranked shortlist every morning
- End-to-end automation: source scraping → deduplication → AI scoring → formatted email delivery — fully autonomous

StyleCode App

2026 – Present

stylecode-app.vercel.app

- Men's fashion advisor web app built solo in React, TypeScript, and Anthropic Claude API — deployed on Vercel and live with UAE-based users
- AI styling recommendations across 3 body-type profiles and 4 seasonal colour palettes; affiliate-monetised via Amazon UAE and Noon
- Mobile version in development: React Native + Expo + Supabase + Gemini API

WORK EXPERIENCE

Lab Assistant – Perfumery Department

Sep 2024 – Present

Sterling Perfumes Industries LLC · Dubai, UAE

- Managed 10,000+ litres of bulk RTF batches monthly at 99% on-time delivery rate across a multi-product fragrance portfolio
- Operated SAP ERP for raw material inventory management — stock tracking, near-expiry flagging, uninterrupted supply
- Optimised 5 fine fragrance formulations through systematic reformulation, achieving 12% raw material cost reduction with zero scent performance compromise
- Authored batch sheets that reduced production team errors and queries by 15%, streamlining R&D-to-production; handoffs
- Executed 25+ fragrance sample compounding cycles per month; daily QC checks (density, stability, olfactory) — zero critical documentation errors

Chemist & QC – Perfumery Department

Jun 2023 – Jul 2024

Faan Al IbdAA Perfumes & Cosmetics · Sharjah, UAE

- Collaborated with 2–4 clients monthly to define requirements and deliver customised fine fragrance samples through the full development cycle
- Developed novel perfume formulations and optimised legacy products within 1% target cost deviation

- Conducted QC testing on 100% of finished batches; prepared all regulatory documentation (COA, IC, MSDS) for domestic and international distribution

SKILLS

Top match for this role: AI agent development & autonomous systems (Stock Trading Agent, event-driven architecture) · Advanced LLM frameworks (Claude API, Groq API, LLaMA 3.3-70b, prompt engineering) · Intelligent workflow automation (n8n, multi-node pipelines, business logic integration) · Python scripting (agents, scrapers, data processing, API clients) · AI system deployment & production infrastructure (Ubuntu VPS, Supervisor, 24/7 uptime) · REST API integration & data pipeline orchestration

AI & Agents	Groq API · LLaMA 3.1 · Claude API · Gemini API · MCP Protocol · Telegram Bot API
Languages	Python 3.12 · Node.js · React / TypeScript · React Native
Automation	n8n · UiPath RPA (in progress) · GitHub Actions · Workflow Design
Infrastructure	Ubuntu VPS · systemd · Supervisor · Vercel · Supabase
Data	pandas · pandas-ta · yfinance
Enterprise	SAP ERP · QC/QA · GLP / EH&S; · Fine Fragrance Compounding
Soft Skills	Systems Thinking · Technical Documentation · Self-directed Learning

EDUCATION

Bachelor of Technology – Chemical Engineering	2017 – 2021
Lovely Professional University · Punjab, India	

CERTIFICATIONS

- UiPath RPA Developer Associate — in progress, exam targeted Q3 2026 (v2024.10 Academy curriculum)
- UAE Driving License (valid)
- Certified – Elementary First Aid & Industrial Safety
- Chemical Engineering Computations using MS Excel – Webinar Certificate

LANGUAGES

English (Fluent) · Malayalam (Native) · Hindi (Proficient)

Open to AI Implementation, Automation, and AI Ops roles — Dubai (hybrid/office) or global (remote)
